Miyasaka Koryo Co., Ltd.

Acquisition of Halal Certification

Miyasaka Koryo Co., Ltd. has acquired Halal certification for the second plant at its Ageo Factory.

Halal certification is given to foods, cosmetics, medicines, and other products that are manufactured under safe and clean processes in accordance with Islamic doctrine, and indicates that the products are safe for use by Muslims.

We have been studying ways to meet the growing demand for food flavorings for overseas markets and the increasing demand for Halal food products in Japan due to the increase in inbound tourism.

The second plant of Ageo Plant is now capable of manufacturing Halal-certified food flavorings by the "Japan Islamic Trust".

With the acquisition of this certification, we will promote sales in the Halal market in Thailand, Malaysia, Qatar, and Middle Eastern countries including the United Arab Emirates, which are mutual certification partners of the Japan Islamic Trust.
